

Campus Access

- All enrolled students are required to be vaccinated, or have an approved medical or religious exemption and be participating in the monitoring program. Student participation in on-campus activities will require proof of vaccination.
- Every visitor to a CUNY campus, whether accessing indoor or outdoor spaces, must provide proof to CUNY that they (i) are fully vaccinated or (ii) have had a negative COVID-19 molecular (PCR) test performed by an accredited lab no more than 7 days prior to the visit.
- Visitors who are on campus for 30 minutes or less per visit do not have to comply with any COVID-19 vaccination or surveillance testing requirements applicable to CUNY staff unless the visitor expects during that time to be less than 6 feet distant of another person for a total of 15 minutes or more.
- Visitors under the age of 12 do not have to comply with any COVID-19 vaccination or surveillance testing requirements unless they are enrolled in programs, but are subject to mask requirements.

Masks

- **All persons entering the campus are required to be wearing a mask at the time of entry.**
- **All students are required to wear masks during classes.**
- Those not fully vaccinated must wear a mask indoors and outdoors at all times.
- All individuals, regardless of vaccine status, are required to wear a mask when physical distancing cannot be maintained.

The only exceptions to the mask mandate are:

- A fully vaccinated person alone in an enclosed space such as an office or conference room
- A vaccinated professor in a classroom where social distancing can be maintained from everyone else in the class
- Briefly while eating or drinking, provided social distancing is maintained.

In the Event of Exposure:

- Fully vaccinated individuals who (i) had close contact with someone with COVID-19 and (ii) shows no symptoms of COVID-19, do not need to quarantine after exposure, but should get tested 3-5 days after their exposure AND not report to in-person work or class until they receive a negative test result or medical clearance to return.
- An unvaccinated person who has had close contact with someone with COVID-19, regardless of whether they have symptoms or not, should quarantine for 10 days after a positive test. Isolation should be longer if symptoms are present - at least 24 hours after no fever without fever-reducing medication and all symptoms are improving.
- Isolation is required for all individuals when diagnosed with COVID-19.
- CUNY will continue to require unvaccinated individuals enter quarantine in the event of possible exposure.

In the Event of High Transmission or Community Spread

- CUNY and each College monitors community spread and adheres to the latest CDC guidance in determining safety protocols required for safe, in-person operations. In general, 100 individuals or 5% of the total on-campus population testing positive using a 14-day rolling average would trigger a transition to remote learning or limit on-campus activities.
- The scale back /shut down campus protocols are outlined in the Reoccupancy Plan located on the website and determinations will be made in consultation with Chancellor and the Office of the COO.
