WIFI – Wireless Access

Mission Statement

The Bronx Community College wireless network is available for all BCC students, faculty and staff. The goal is to provide a functional wireless network to the college community. BCC-WNET is designed to expand services to users with laptops equipped for wireless networking. The wireless technology breaks the traditional limitations of network access via a physical cable and allows users to perform computing tasks from wireless enabled locations throughout campus. The mobility and flexibility of wireless networks allows for more efficient and productive work. Instructors will have the freedom to move about a classroom while still being able to manipulate the classroom computer via a wireless connection. Any student, faculty or staff member with a BCC network account is eligible to access the BCC-WNET. Students already exposed to mobile technology such as cell phones, laptops and tablets, will welcome the flexibility and mobility that wireless technology brings.
